

For a smooth swim, ensuring you don't sink into testnet pools

PROBLEM

Participating in hackathons often involves the hassle of obtaining testnet tokens, causing delays and hindering the hackers' ability to start working promptly 🕒

Lack of a streamlined process for sending and receiving tokens, especially during non-standard hours, leads to confusion and delays 😞

This results in stress and time loss for hackers, hindering their focus on the actual competition 😬

SOLUTION

 FaucETH addresses the challenges faced by hackathon participants in acquiring testnet tokens, ensuring a smoother experience 🥤

The platform serves as a pool where event organizers can add testnet tokens, and approved hackers can withdraw them effortlessly 🏊

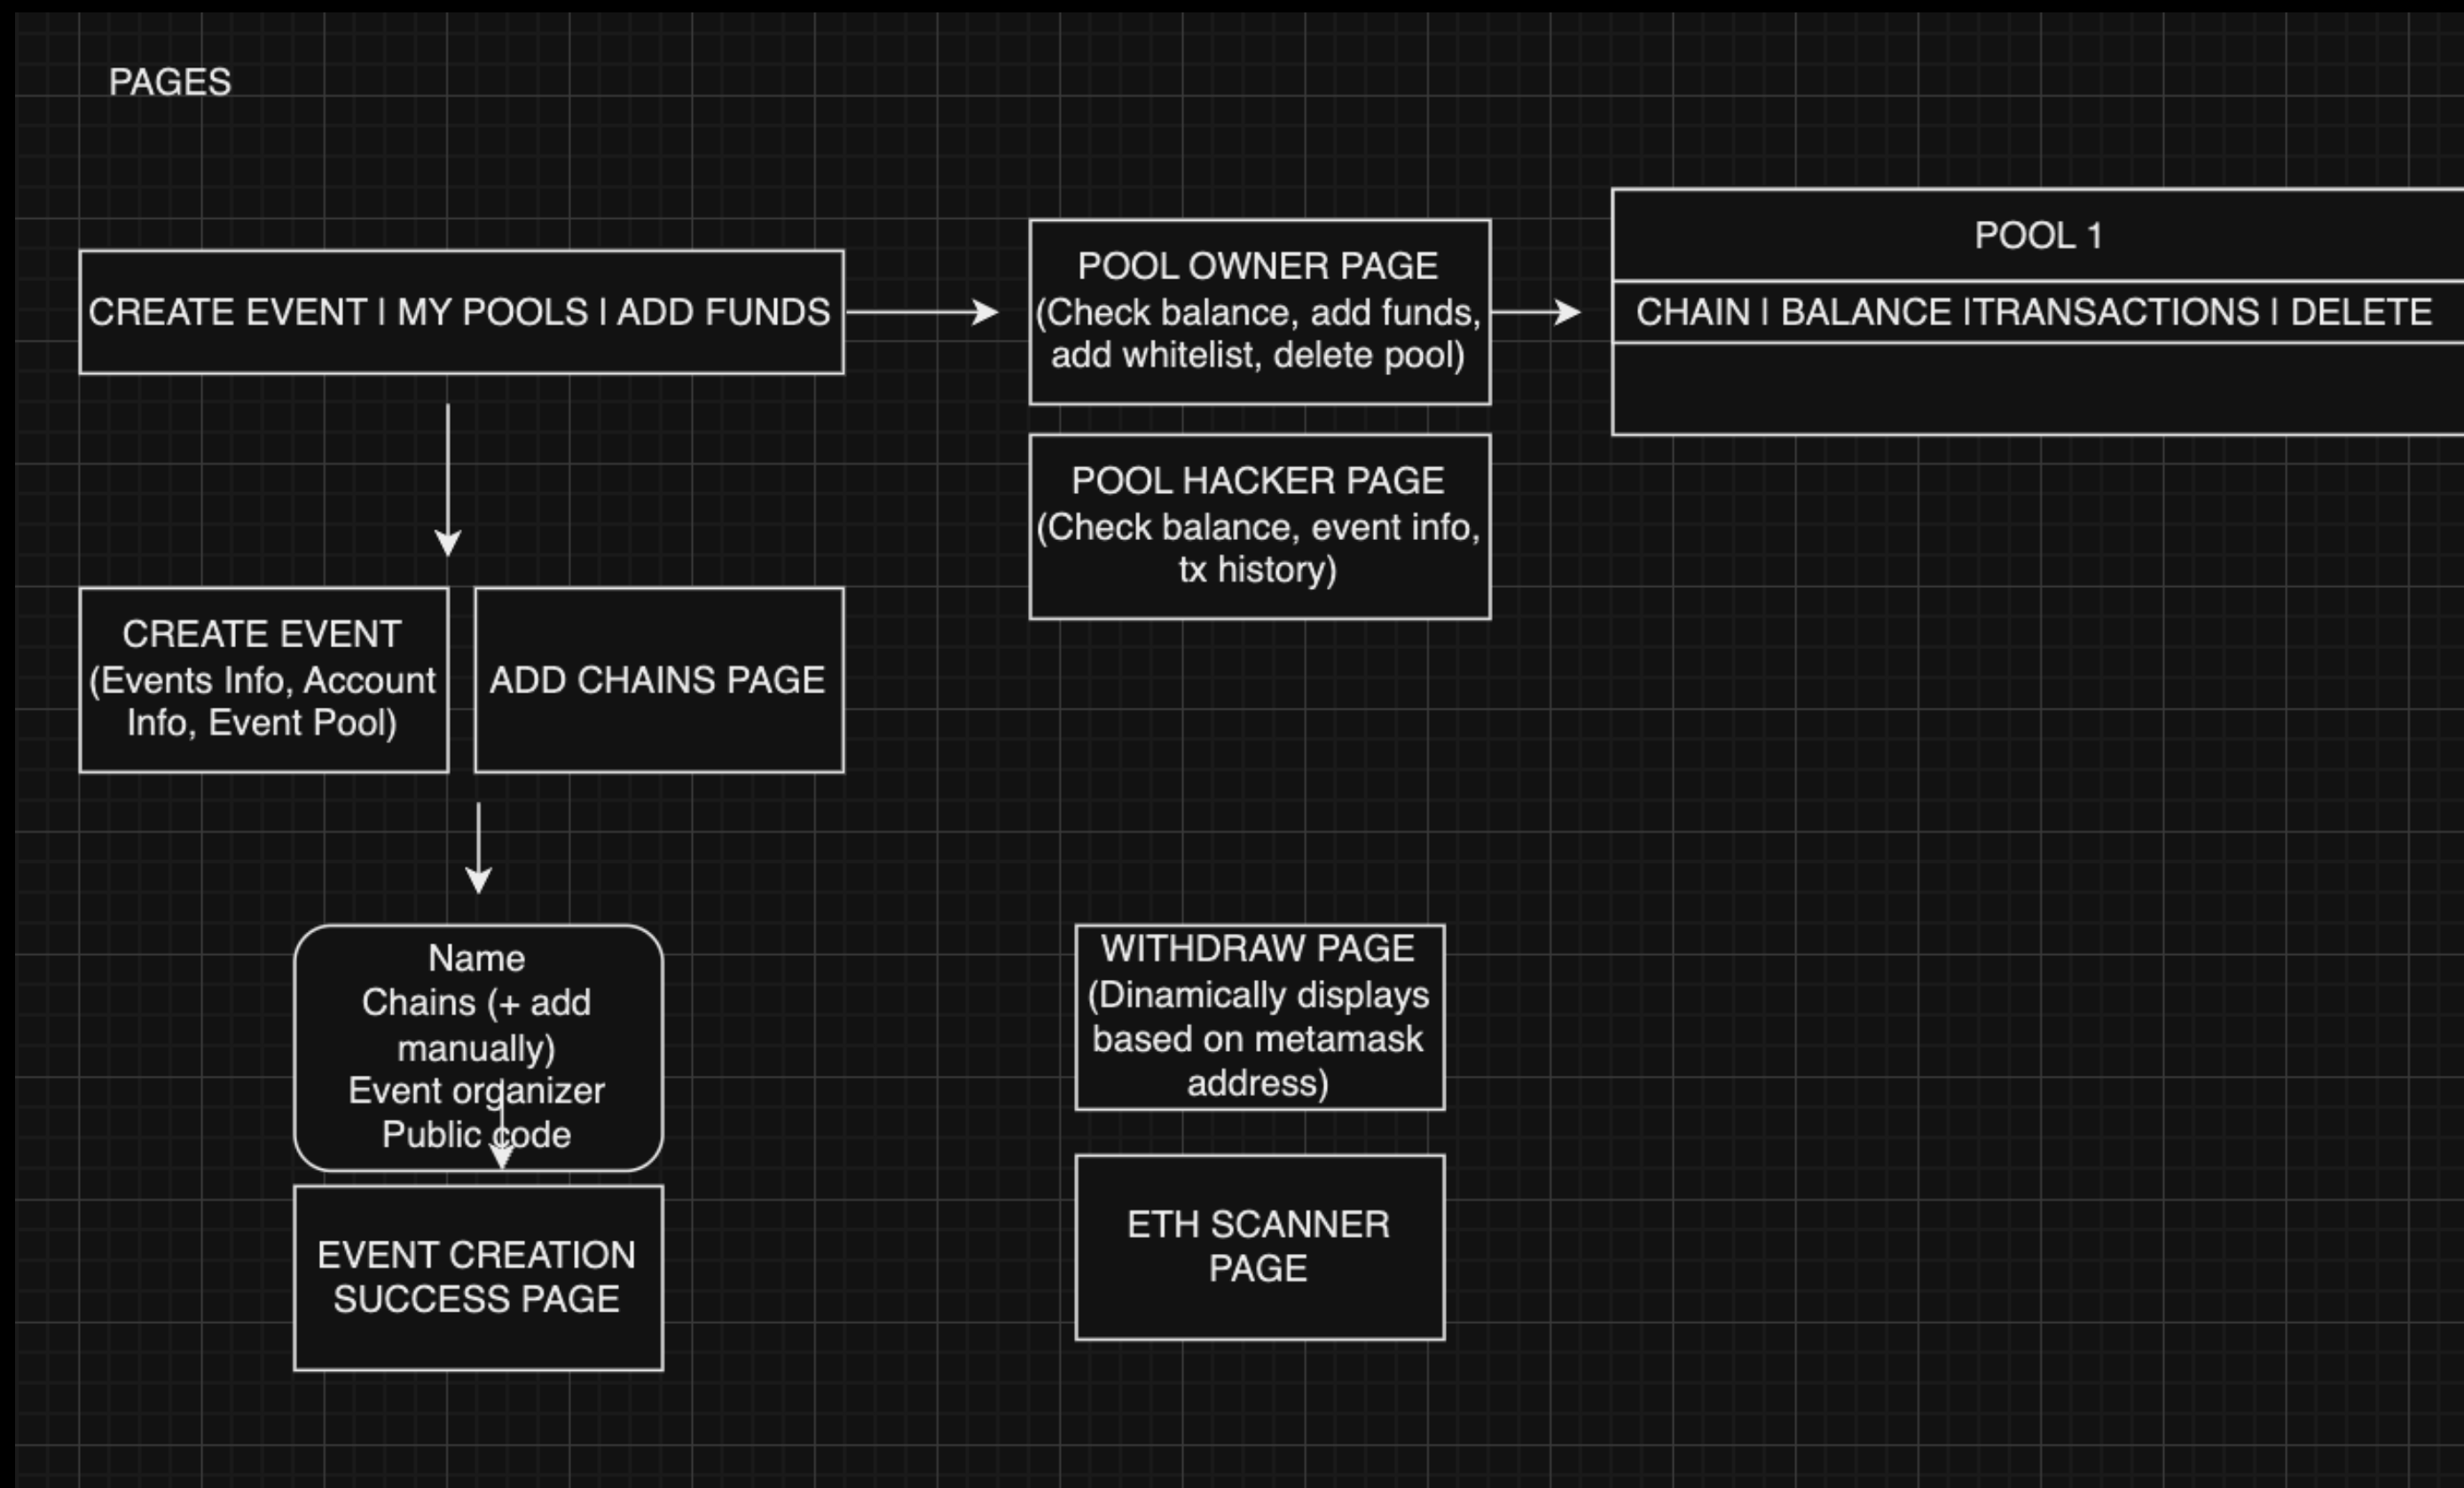

FLOW

Event organizers create a new event on the platform 

Sponsors receive a unique code and use it to send testnet tokens to a designated pool 

Whitelisted hackers can smoothly pull testnet funds from the pool
